PRODUCT SAFETY/MSDS INFORMATION: (412) 492-5555 7:00 a.m.

- 4:30 p.m. EST

**Product ID:** DF705 (0808)

PRODUCT NAME: LIGHTWEIGHT FILLER

 SYNONYMS:
 None

 ISSUE DATE:
 05/02/2006

 EDITION NO.:
 3

 CHEMICAL
 POLYESTER

FAMILY:

#### **EMERGENCY OVERVIEW:**

Combustible. Keep away from heat, sparks, flames, and other sources of ignition. Do not smoke.CAUSES EYE IRRITATION.MAY CAUSE SLIGHT SKIN IRRITATION.MAY BE ABSORBED THROUGH THE SKIN.VAPOR AND/OR SPRAY MIST MAY BE HARMFUL IF INHALED. VAPOR IRRITATES EYES, NOSE, AND THROAT.HARMFUL IF SWALLOWED.UNSTABLE - HAZARDOUS REACTIONS, POSSIBLY VIOLENT, MAY OCCUR. REACTS STRONGLY WITH WATER GENERATING LARGE AMOUNTS OF HEAT.

# **SECTION 2 - COMPOSITION INFORMATION**

The following ingredient(s) marked with an "x" are considered hazardous under applicable U.S. OSHA and/or Canadian WHMIS regulations. If no ingredients are listed, then there are no U.S. OSHA and/or Canadian WHMIS hazardous ingredients in this product.

<u>Material/</u>	<u>Percent</u>	<u>Hazardous</u>	
CAS Number			
TALC	15 - 40	X	
14807-96-6			
STYRENE MONOMER	10 - 30	X

471-34-1			and 15 for
			information.

# **SECTION 3 - HAZARDS IDENTIFICATION**

# **ACUTE OVEREXPOSURE EFFECTS**

#### **EYE CONTACT:**

Causes eye irritation. Redness, itching, burning sensation and visual disturbances may indicate excessive eye contact.

# SKIN CONTACT:

May cause slight skin irritation. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

# SKIN ABSORPTION:

May be absorbed through the skin.

# INHALATION:

Vapor and/or spray mist may be harmful if inhaled. Vapor irritates eyes, nose, and throat.

#### INGESTION:

Harmful if swallowed.

# SIGNS & SYMPTOMS OF OVEREXPOSURE:

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Eye watering, headaches, nausea, dizziness and loss of coordination are indications that solvent levels are too high. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. Dryness, itching, cracking, burning, redness, and swelling are conditions associated with excessive skin contact.

# MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Not applicable.

#### CHRONIC OVEREXPOSURE EFFECTS

Avoid long-term and repeated contact.

Repeated exposure to vapors above recommended exposure limits (see Section 8) may cause irritation of the respiratory system and permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. This product contains talc. In a lifetime inhalation study female rats exposed to an elevated respirable concentration (9 times the Permissible Exposure Limit) of cosmetic grade talc developed lung cancer.

The effects of long-term, low level exposures to this product have not been determined. Safe handling of this material on a long-term basis should emphasize the prevention of all contact with this material to avoid any effects from repetitive acute exposures. See Section 11, of this MSDS for a detailed list of chronic health effects information available on individual ingredients in this product.

#### **SECTION 4 - FIRST AID MEASURES**

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available.

### **EYE CONTACT:**

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists, contact a poison control center, emergency room, or physician as further treatment may be necessary.

# SKIN CONTACT:

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

# INHALATION:

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

# INGESTION:

Gently wipe or rinse the inside of the mouth with water. Sips of water may be given. Never give anything by mouth to an unconscious person. Contact a poison control center, emergency room or physician right away as further treatment may be necessary.

# **SECTION 5 - FIRE FIGHTING MEASURES**

FLAMMABLE PROPERTIES

FLASHPOINT: 106 Degrees F ( 41 Degrees C) FLASHPOINT TEST METHOD:

Pensky-Martens Closed Cup

UEL: Not Available.

**LEL:** 1.1

**AUTOIGNITION TEMPERATURE:** 

Not Available.

**Product ID: DF705 (0808)** PRODUCT NAME: LIGHTWEIGHT FILLER

#### **EXTINGUISHING MEDIA:**

Use National Fire Protection Association (NFPA) Class B extinguishers (carbon dioxide, dry chemical, or universal aqueous film forming foam) designed to extinguish NFPA Class II combustible liquid fires. Water spray may be ineffective. Water spray may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

# PROTECTION OF FIREFIGHTERS:

Fire-fighters should wear self-contained breathing apparatus and full protective clothing

# UNUSUAL FIRE AND EXPLOSION HAZARDS:

Keep this product away from heat, sparks, flame, and other sources of ignition (i.e., pilot lights, electric motors, static electricity). Invisible vapors can travel to a source of ignition and flash back. Do not smoke while using this product. Keep containers tightly closed when not in use. Closed containers may explode when overheated. Do not apply to hot surfaces. Toxic gases may form when this product comes in contact with extreme heat. May produce hazardous decomposition products when exposed to extreme heat. Extreme heat includes, but is not limited to, flame cutting, brazing, and welding.

## SECTION 6 - ACCIDENTAL RELEASE MEASURE STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Provide maximum ventilation. Only personnel equipped with proper respiratory, skin, and eye protection should be permitted in the area. Remove all sources of ignition. Take up spilled material with sand, vermiculite, or other noncombustible absorbent material and place in clean, empty containers for disposal. Only the spilled material and the absorbant should be placed in this container.

#### **SECTION 7 - HANDLING AND STORAGE**

PRECAUTIONS TO BE TAKEN DURING HANDLING AND STORAGE: Vapors may collect in low areas. If this material is part of a multiple component system, read the Material Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts. Containers should be grounded when

pouring. Avoid free fall of liquids in excess of a few inches.

#### STORAGE:

Do not store above 90 degrees F.(32 degrees C.). Store large quantities in buildings designed and protected for storage of NFPA Class II combustible liquids.

#### SECTION 8 - EXPOSURE CONTROLS & PERSONAL PROTECTION **ENGINEERING CONTROLS:**

Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 8 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

#### PERSONAL PROTECTIVE EQUIPMENT EYES:

Wear safety glasses with side shields. SKIN/GLOVES:

Wear protective clothing to prevent skin contact. Apron and gloves should be constructed of: impermeable material. No specific permeation/degradation testing have been done on protective clothing for this product. Recommendations for skin protection are based on infrequent contact with this product. For frequent contact or total immersion, contact a manufacturer of protective clothing for appropriate chemical impervious equipment. Clean contaminated clothing and shoes.

#### RESPIRATOR:

Overexposure to vapors may be prevented by ensuring proper ventilation controls, vapor exhaust or fresh air entry. A NIOSH- approved air purifying respirator with the appropriate chemical cartridges or a positivepressure, air-supplied respirator may also reduce exposure. Read the respirator manufacturer's instructions and literature carefully to determine the type of airborne contaminants against which the respirator is effective. its limitations, and how it is to be properly fitted and used. Provide general dilution or local exhaust ventilation in volume and pattern to keep the concentration of ingredients listed in Section 2 below the lowest suggested exposure limits, the LEL below the stated limit, and to remove decomposition products during welding or flame cutting.

GENERAL HYGIENE - ESTABLISHED EXPOSURE LIMITS

If Threshold Limit Values (TLVs) have been established by ACGIH, OSHA, Ontario or PPG, they will be listed below. These limits are intended for use in the practice of industrial hygiene as guidelines or recommendations in the control of potential workplace health hazards. These limits are not a relative index of toxicity and should not be used by anyone without industrial hygiene training.

## SUPPLEMENTAL HEALTH INFORMATION:

Material/	<u>Percent</u>	
CAS		Ingredient Specific Animal Data:
<u>Number</u>		
STYRENE MONOMER 100-42-5	10 - 30	This product contains styrene, which has been classified as a Class 2B carcinogen (possibly carcinogenic to humans) by the International Agency for Research on Cancer (IARC). In the body, styrene is metabolized to styrene-7,8-oxide, which has been classified as a Group 2A carcinogen (probably carcinogenic to humans). Styrene has been shown to cause probable hearing loss in rats exposed for at least six hours per day for three to thirteen weeks to 800 ppm of styrene in the air. No effects were observed in rats exposed to styrene at 200 ppm for thirteen weeks. Based on animal studies and human experience, no significant risk of hearing loss is expected in occupationally exposed people. Repeated exposures to
		styrene vapor have been found to cause liver toxicity in mice at levels above 100 ppm. In addition, styrene has shown mutagenic effects in in-vitro tests which included metabolic activation.

No information available.

# SECTION 13 - DISPOSAL CONSIDERATIONS

Provide maximum ventilation, only personnel equipped with proper respiratory and skin and eye protection should be permitted in the area. Take up spilled material with sawdust, vermiculite, or other absorbent material and place in containers for disposal.

Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations. Empty containers should be recycled by an appropriately licensed reconditioner/salvager or disposed of through a permitted waste management facility. Additional disposal information is contained on the Environmental Data Sheet for this product, which can be obtained from your PPG representative.
